Deviations of 6 mm under a 3- meter rule will be tolerated. Outside this limit the base must be levelled using an appropriate and approved technical solution.
Color	Red Green
Membrane Mass	1650 g/m ² ± 10 %
Membrane Thickness	9 mm ± 10 %
Standard roll Width	2 m
Standard roll Length	36,20 m
Standard roll Weight	approx. 120 kg
Court markings	Line Paint, approx. 65 Kg per court.
Infill	Ultra-fine ceramic quartz sand specified by Viganò Pavitex. Red or green. Standard quantity: 7 k./m ² .
Adhesive	Two-component PU glue in stripes (approx. 750 g/m ²).
Playing features	ITF Category 1 «Slow». 
Warranty	5 years (see warranty conditions available upon request)
Maintenance	See Top Sand® Maintenance Guidelines .
Installation	See Top Sand® Installation Guidelines .
Certification	Viganò Pavitex ISO 9001:2015. Certificate Number: IT 240282

Top Sand® Features

Tennis Play

- ITF pace Classification Class 1 SLOW
- Foot slide is controlled, not slippery. Intermediary ball bounce height, not too low, not too high.
- All the spins, top-spin, slice, cut, work naturally, as on clay.
- Playable when wet. Dries quickly after a heavy rain.
- The sand, even when dry in the summer, isn't blown off the surface by strong winds. In covered courts the walls and ceilings of the building aren't soiled, nor is the rest of the club.

Comfort

- The sand moves with the foot as it pivots, facilitating the most important foot movement in tennis.
- Either in red or green sand, the colors and the texture are pleasant and welcoming, creating a sense of comfort. The ultra-fine sand keeps its colors for years.

Financial

- Watering is not a necessity. No yearly maintenance. Daily maintenance is reduced to use of the drag mat as needed.
